DETAILED ACTION

1. A new lack of unity requirement is set forth below.
2. This application is a 371 of PCT/AU99/00659. For applications filed under 371, PCT rules for lack of unity apply.
3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 32-35, drawn to a monoclonal antibody capable of inhibiting cytokines IL-3, GM-CSF and IL-5 to the common receptor β_c and a method of identifying an inhibitor capable of competitively inhibiting the binding of BION-1 to the β_c subunit.

Group II. Claims 36-39, drawn to a method of inhibiting cytokines IL-3, GM-CSF and IL-5 mediated leukaemic cell proliferation by contacting the cells with monoclonal antibody capable of inhibiting the binding of cytokines IL-3, GM-CSF and IL-5 to the common receptor β_c .

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2 they lack the same or corresponding special technical feature for the following reasons:

The PCT rules define a special technical feature as a feature which defines a contribution over the prior art. The first claimed invention fails to recite such a feature, since WO 97/28190 discloses

Art Unit: 1646

such an antibody (paragraphs bridging pages 8-9). Since the first claimed invention lacks a special technical feature, the other claimed inventions cannot share a special technical feature with the first claimed invention. The invention of Group II is patentably distinct from the product of Group I because the product can be used in a materially different method, such as immunochromatography.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Applicant is given ONE MONTH from the mailing date of this communication within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.
